Cleaning and Maintenance

- On issue the wears name and the date should be marked on the label.
- Visually inspect prior to use for deterioration or damage.
- Discard bump caps which have splits, cracking or excessive fading and helmets that have been – altered, exposed to impact, roughly treated or subjected to substances such as petrol, paint, adhesives or aerosol sprays.
- Regular cleaning using warm water and soap is recommended.
- The harness should be removed from the shell prior to cleaning.
- Do not use solvents or harsh cleaning agents as these can damage the helmet parts.
